Art Unit: 1641

The changes to Patent Practice and Procedure published at 62 Fed. Reg. 53131 (October 10, 1997); 1203 Off. Gaz. Pat. Office 63 (October 21, 1997) took effective December 1, 1997.

Under these changes new grounds of rejection are prohibited in examiner's answers.

The proposed AMENDMENT AND REMARKS filed December 1, 1998 (paper no. 8) will not be entered and the final rejection stands because the proposed amendment raises new issues that would require further search and/or consideration. As stated in a telephone interview with Ms. Vicki Lorton on October 27, 1998, the outstanding rejection of claims 1, 2, 4 and 6-9 under 35 U.S.C. § 102(b) as clearly anticipated by Imrich et al. (US 5,415,994) would probably change to an obviousness rejection if claims substantially similar to the discussed draft claims were made of record. Since the proposed claims filed December 1, 1998, which are substantially similar to the discussed draft claims; are not sufficient to place the application in condition for allowance; would require further search and consideration of the obviousness of inserting a capillary/immunochromatographic test strip into an extraction mixture; and, therefore, require a new grounds of rejection based upon Imrich et al. and possibly another reference(s), entry of the proposed claims is **denied**.

The Declaration of Richard H. Schwartz under 37 CFR 1.132 filed December 1, 1998 is insufficient to overcome the rejections of claims 1-9 based upon Imrich et al. (US 5,415,994) alone or in combination with Bogart et al. (US 5,494,801) and Murray (US 3,957,436) as set forth in the last Office action because:

Art Unit: 1641

It refer(s) only to the OSOM™ system and not to the individual claims of the application. Thus, there is no showing that the objective evidence of nonobviousness is commensurate in scope with the claims. See MPEP § 716. Moreover, no specifics are provided for the comparative testing with Quidel QuickVue™ In-Line Strep A Test. It is unclear whether this QuickVue™ is identical with Imrich et al. or not. Therefore, the Schwartz Declaration is not persuasive.
